Electrosoft Newsletter: Q1 2021

What's Happening at Electrosoft?

20th ANNIVERSARY Electrosoft
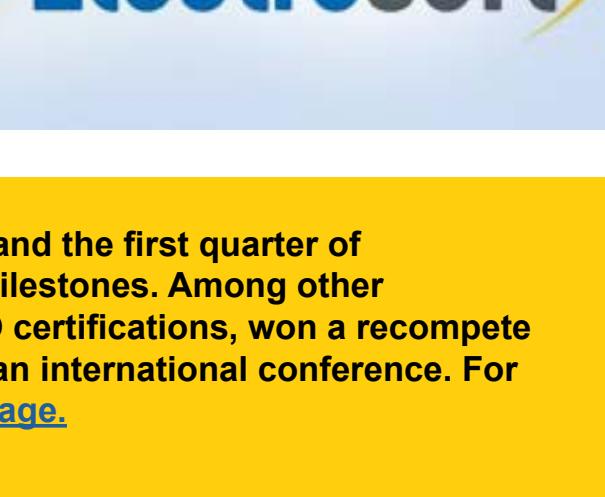

2021 marks Electrosoft's twentieth year in business and the first quarter of this momentous year brought a variety of success milestones. Among other accomplishments, we achieved two international ISO certifications, won a recompete prime contract with a treasured client and keynoted an international conference. For all of our news and postings, please visit our news page.

## Electrosoft Achieved Two ISO/IEC Certifications
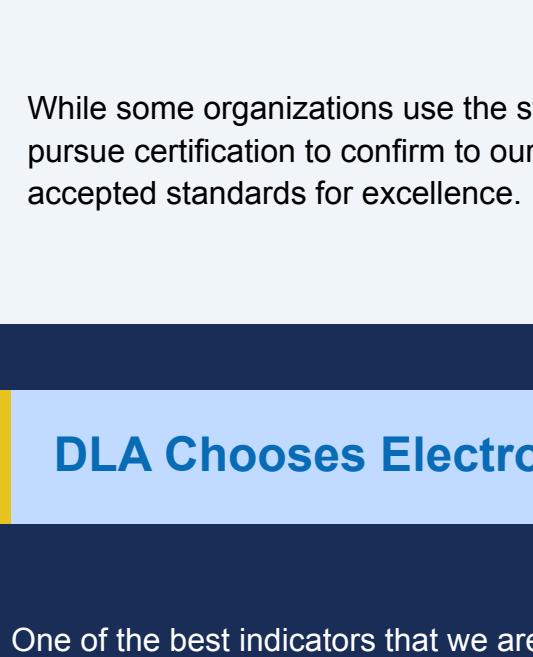

Since the founding of Electrosoft twenty years ago, we have held ourselves to the highest standards of quality and excellence in the way that we manage and deliver IT services to federal customers. We're proud that this diligence has led to a growing business with mature processes and a reputation for serving customers well.

That's why we're especially proud of achieving two ISO/IEC certifications in Q1.

- **ISO/IEC 27001:2013** addresses a company's Information Security Management Systems. The international standard outlines requirements for the policies, processes and systems a company – and its employees and contractors – use to manage information security.

- **ISO 20000-1:2018** addresses IT Service Management Systems, setting international standards for the effective and efficient delivery of IT professional services to external customers.

While some organizations use the standards as frameworks for best practices, Electrosoft chose to pursue certification to confirm to ourselves and our customers that we are meeting internationally accepted standards for excellence.

DLA Chooses Electrosoft for Follow-On Contract
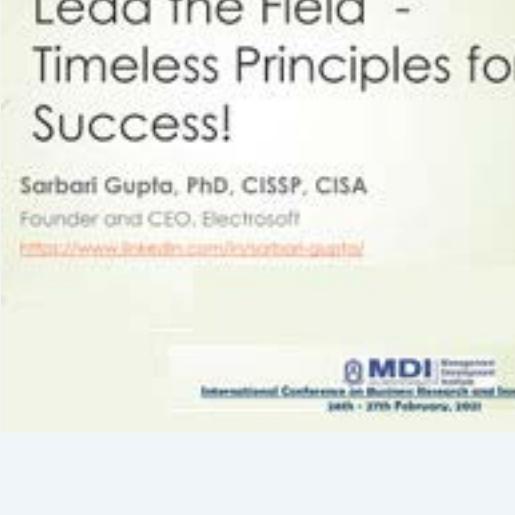

One of the best indicators that we are combining deep technical expertise with customer service is when customers choose to continue working with us when an existing contract expires. We are always proud of our team when this happens – and excited for every opportunity to continue delivering IT services that make a difference to a customer's mission.

In Q1, we were delighted that the Defense Logistics Agency (DLA) selected Electrosoft for a follow-on prime contract to continue delivering Enterprise Business System Program Management Office support.

Thank you, DLA. We look forward to building on our work together.

Dr. Sarbari Gupta Delivers Keynote at ICBRI 2021

Lead the Field - Timeless Principles for Success!

Sarbari Gupta, PhD, CISSP, CISA
Founder and CEO, Electrosoft
https://www.linkedin.com/in/sarbari-gupta/

MDI
International Conference on Business Research and Innovation
24th – 25th February, 2021

If you know our CEO, Dr. Sarbari Gupta, you know how much she believes in sharing knowledge. She has been active in the information security industry for more than 25 years, specializing in cybersecurity, digital identity and access management as well as cloud security. Recognized as a leading industry expert and business leader, Dr. Gupta is a frequent speaker at industry conferences and has authored over 40 technical papers/ presentations on leading-edge topics.

In February, Dr. Gupta was a keynote at the International Conference on Business Research and Innovation 2021. Conducted virtually from Murshidabad, India, ICBRI 2021 provided a platform to showcase recent research in the areas of business research and innovation. Dr. Gupta's keynote address, "Lead the Field: Timeless Principles of Success," emphasized the role of continuous improvement as essential for businesses.

#ICYMI: Zero Trust Podcast

The concept of Zero Trust, a security approach that urges organizations to verify anything and everything connecting to its systems before granting access, is garnering increasing attention by government and industry alike.

If you haven't yet watched our "The Move to Zero Trust" podcast, the second in a series of podcasts addressing the most pressing cybersecurity concerns for federal government, read this article for a description of the podcast. Or view our CEO, Dr. Sarbari Gupta, and Security Analyst, Proud-Madruga on YouTube, here.
